JPT has always placed high emphasis in computerisation of all its works processes to ensure high efficiency and timely delivery of services at the highest quality to the clients.

Most JPT's work processes ranging from engineering design to draughting and clerical works are generally computer aided. The computer to staff ratio in JPT is 1:1 which means all engineers, draughtpersons and secretaries are equipped with one dedicated computer station to perform their daily works.

All computer stations are connected through JPT's local area network to ensure seamless transfer of knowledge and efficient use of all ICT equipments.

JPT believes that the key to success lies in effective communications, both internally and with our clients. In order to achieve this, JPT's office is equipped with internet email and connected to the world wide web. Our website is www.jpt.com.my

JPT is also constantly upgrading and sourcing for the latest state of the art engineering analysis and CAD software and tools to ensure all design and services are of the highest quality. In addition to that, JPT's team of engineers are also producing their own in-house software, customized specifically for their project needs.

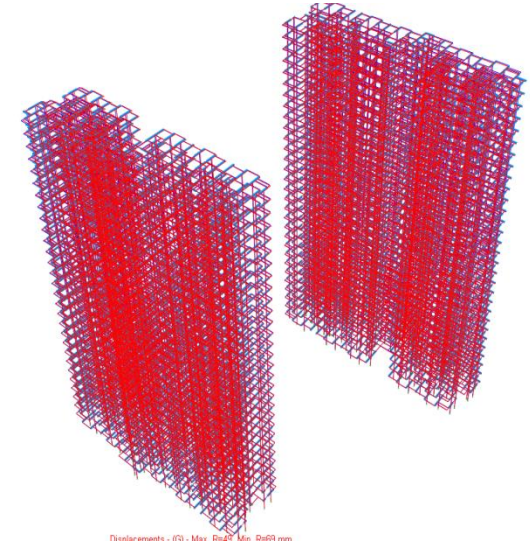

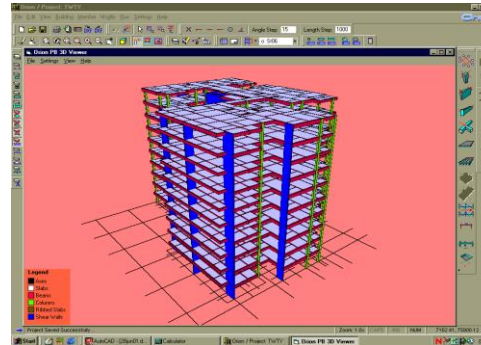

The following are selection of computer software available in JPT office :

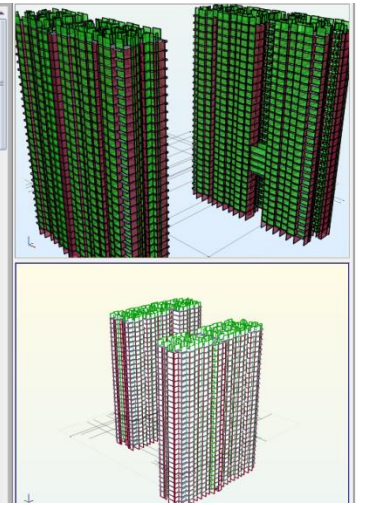

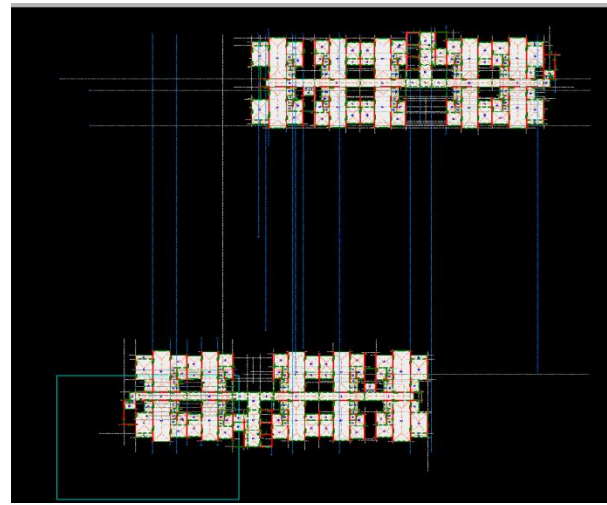

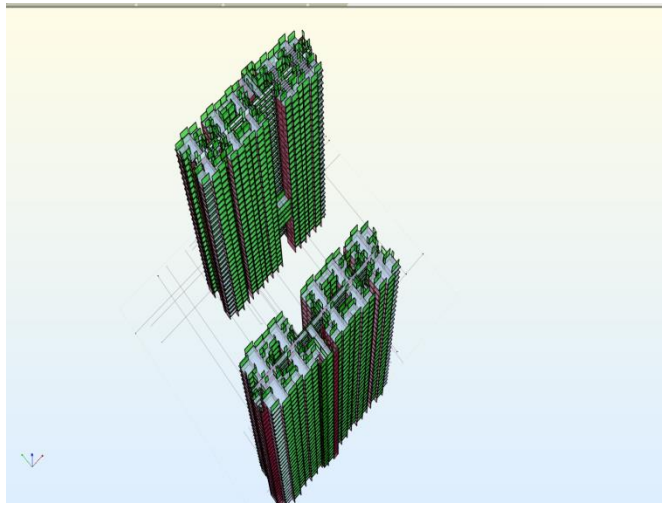

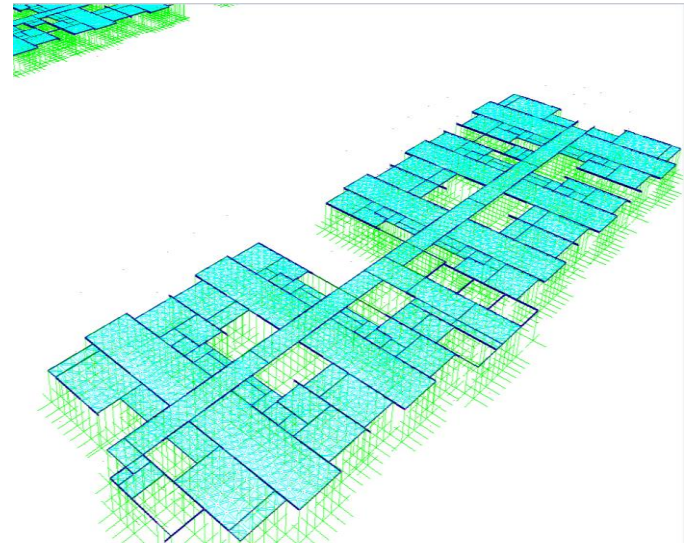

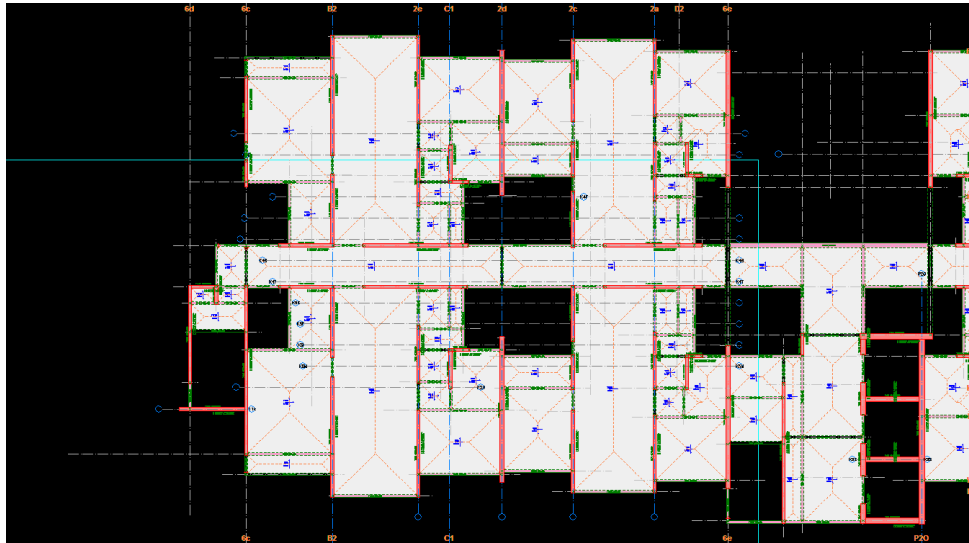

structural analysis

ORION ver. 17.0

A structural analysis, design and drafting program developed for the design of building systems. It is capable of performing the following tasks:

- 3-D structural modeling and analysis of high-rise building
- design of RC columns, beams, shear walls, flatslab, etc
- Foundation Design
- Concrete and Steel Quantity Extractions

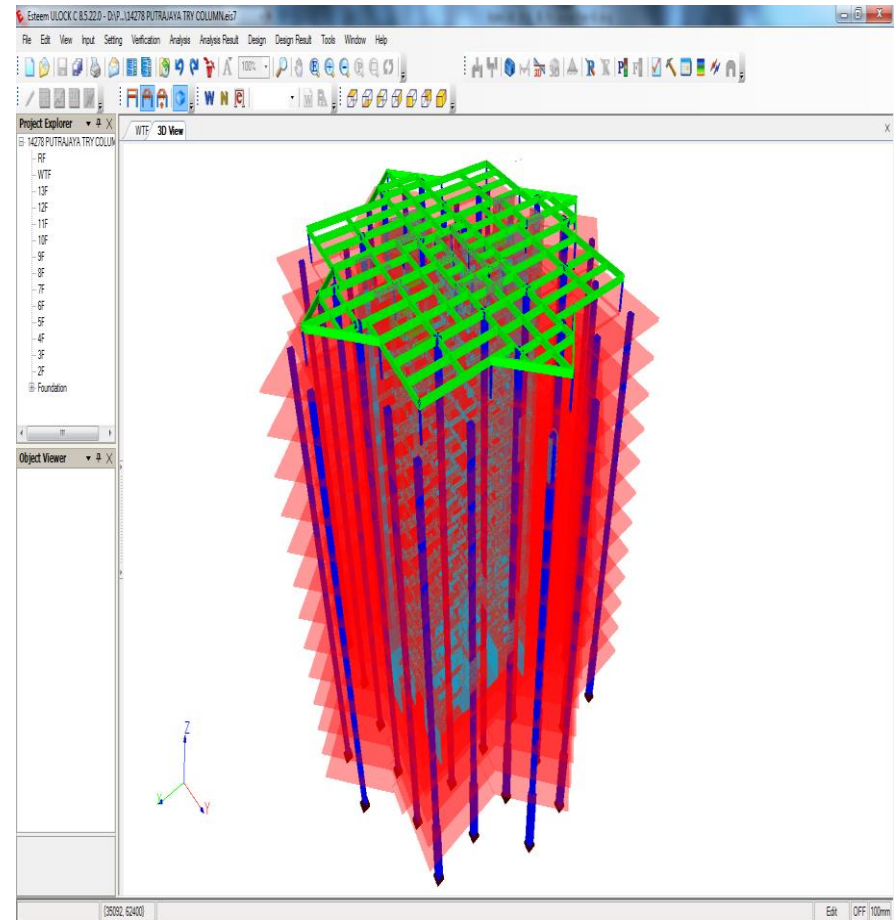

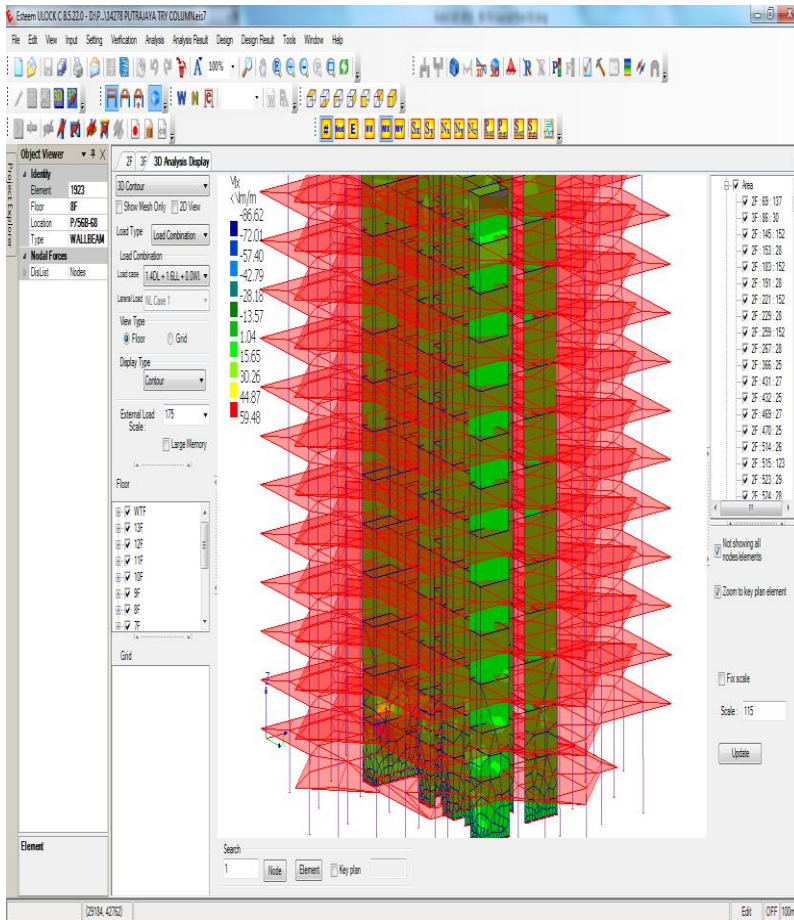

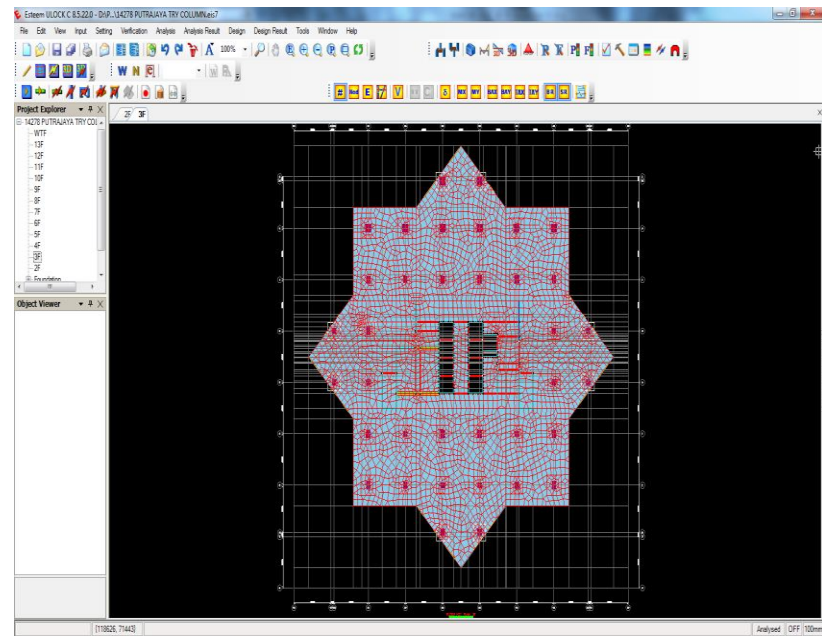

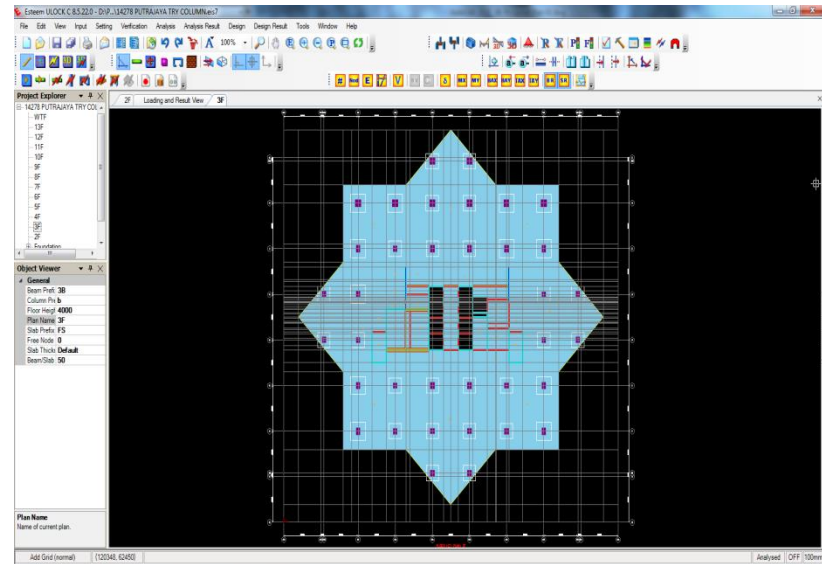

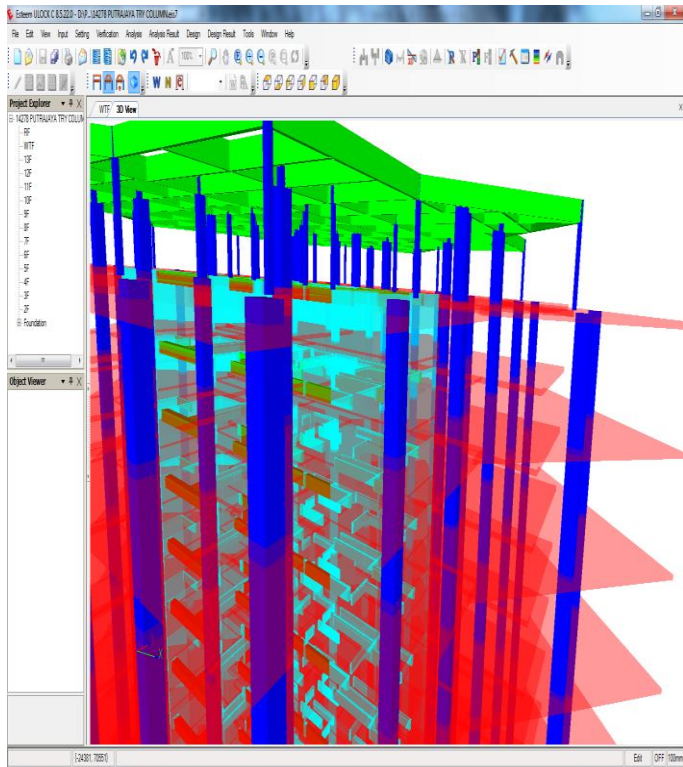

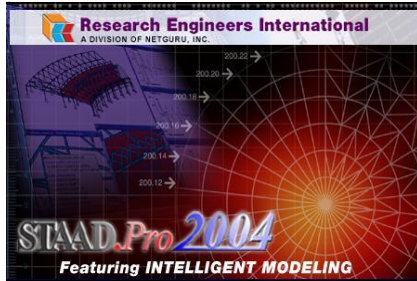

ESTEEM 9.0

Computer program capable to perform advanced Finite Elements auto – modeling to make 3-D analysis), design, detailing, drafting and quantity take-off of reinforced concrete structures

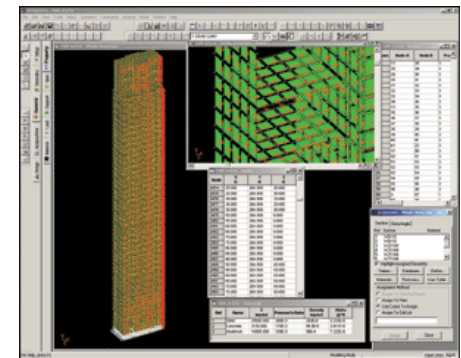

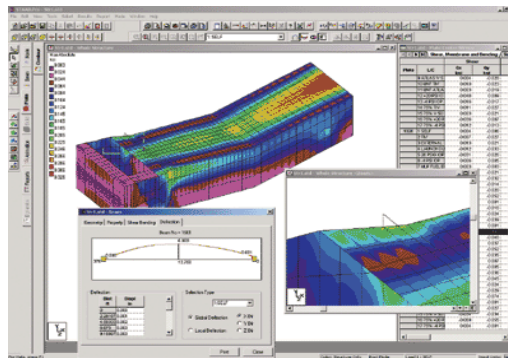

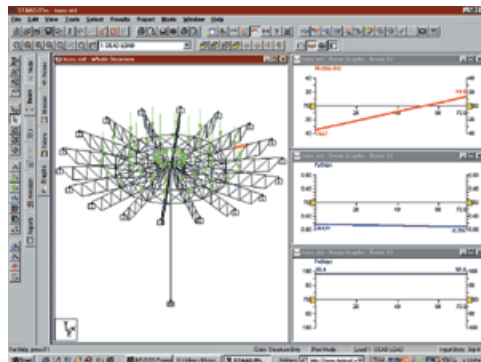

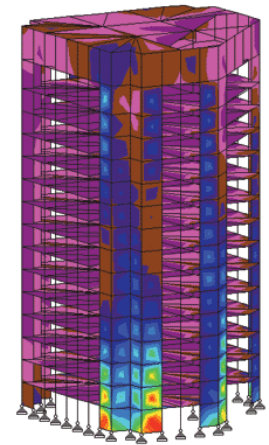

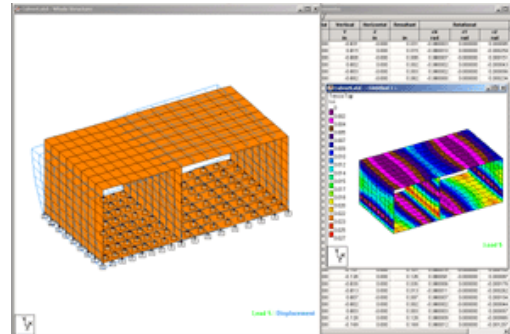

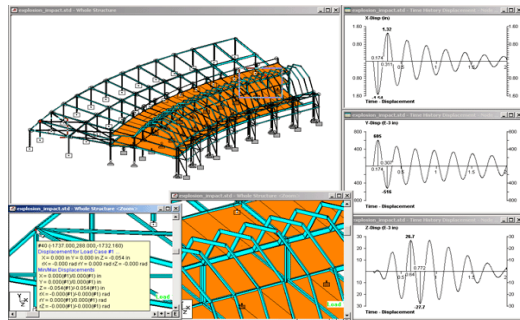

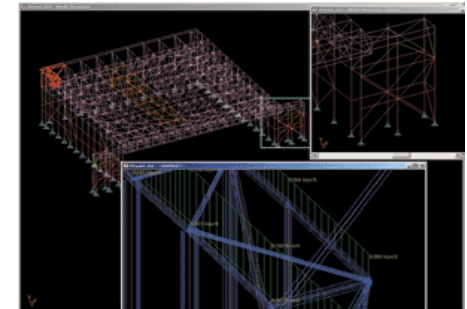

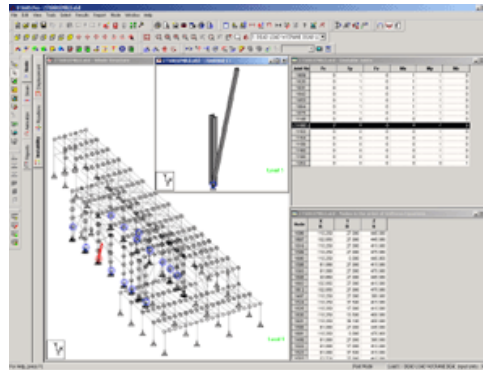

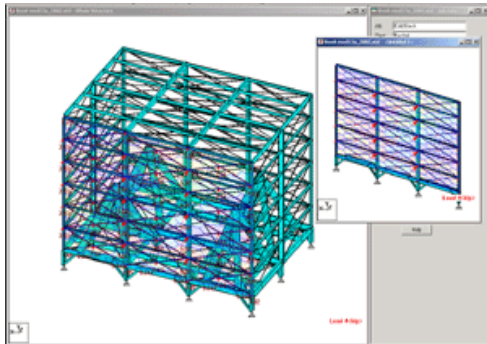

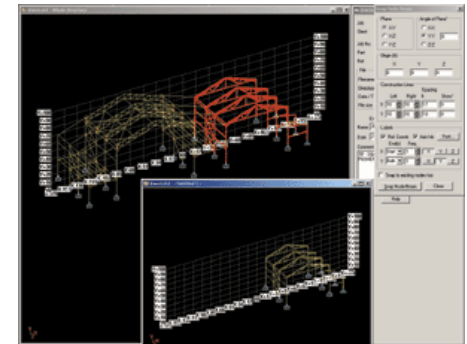

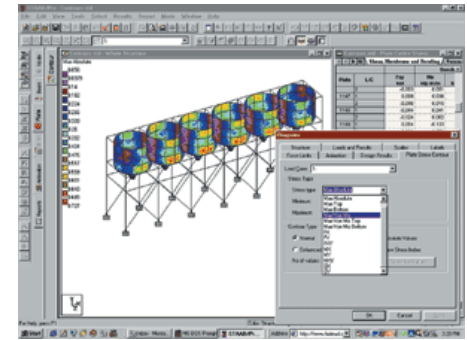

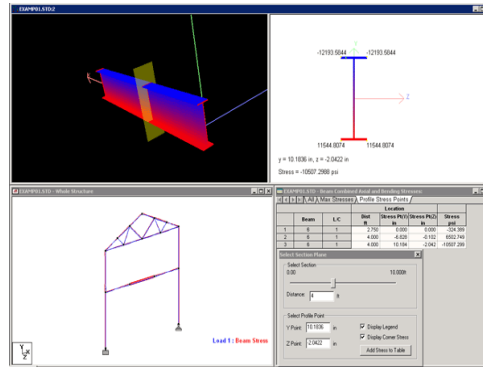

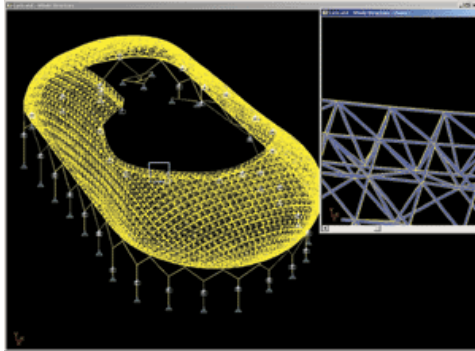

STAAD Pro 2004

Computer program capable to perform multi-material modeling and design in 2-D and 3-D system using static, P-Delta, dynamic and non-linear analysis.

UNIVERSITI PENDIDIKAN SULTAN IDRIS
kampus bandar proton

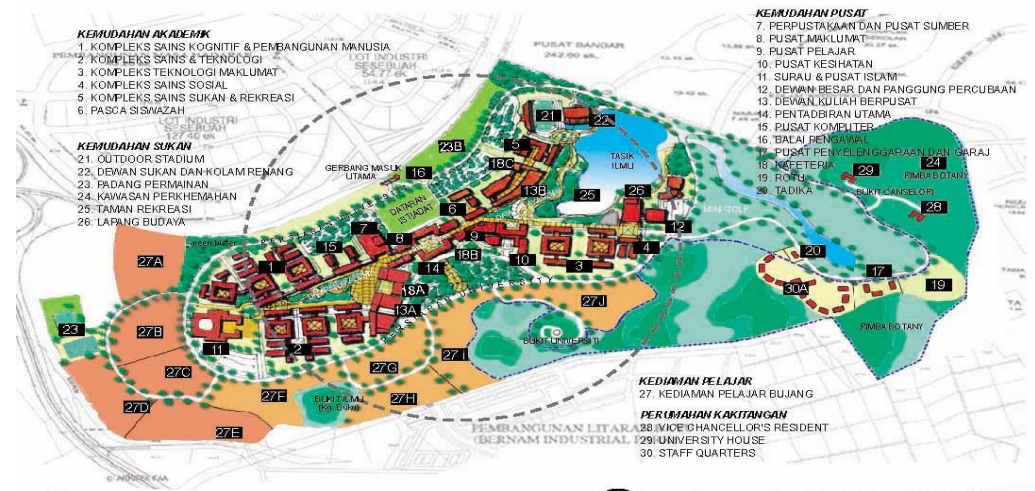

The Universiti Pendidikan Sultan Idris Main Campus in Proton City is a full fledged public university, planned for an ultimate capacity of 21,000 students. The university is developed by M/s. Proton City Development Corporation Sdn Bhd for the end-user Universiti Pendidikan Sultan Idris through Government funding.

Jurutera Perunding Tegap Sdn Bhd is appointed by the Proton City Development Corporation Sdn Bhd as the Lead Consultant for the overall master planning and detail implementation of the said campus development.

In terms of master planning, the campus is planned over an area of 800 acres, situated at the south western portion of Proton City. The university planning is conceptualized based on a hybrid of the integrated and traditional campus concept whereby the campus is seen as a huge mega structure; a large complex with no boundaries and shared facilities to encourage inter-faculty interaction in academic and social programmes. The campus will embrace a universal character with no obvious segregation among faculties in order to promote inter-disciplinary interaction among students and also academic courses. Though universal in character, each complex will have its formal entry and identity. Various faculties are grouped into complexes, unified through an academic spine which is designed to fit within the ten-minute 400 meter radius - a comfortable walking distance within 10 minutes break between lectures.

A total of 730,106 m.sq of built floor space is planned for the campus and the construction cost is estimated at RM858 million.
